Re: FCC GEN Docket No. 93-252, Regulatory  
Treatment of Mobile Services,  
Notice of Written Ex Parte Presentation

Gentlemen:

This is to notify the Office of the Secretary that today the law firm of Keller and Heckman, representing the Southern Company, submitted a written ex parte presentation to Karen Brinkman, Esq., Special Assistant to Chairman Hundt. In accordance with the Commission's rules, we are enclosing two copies of the presentation for inclusion in the record of the above-referenced proceeding.

Very truly yours,

*Carole C. Harris*

FEDERAL COMMUNICATIONS COMMISSION  
 OFFICE OF SECRETARY

Re: FCC GEN Docket No. 93-252, Regulatory  
 Treatment of Mobile Services,  
 Written Ex Parte Presentation

Dear Ms. Brinkman:

On July 29, 1994, Elizabeth R. Sachs wrote you concerning the availability of spectrum in Atlanta, Georgia for a second 800 MHz wide-area SMR. According to her letter (the Letter) (a copy of which is enclosed), Ms. Sachs had met with you some time earlier in her capacity as General Counsel for the American Mobile Telecommunications Association, and during the course of your discussions, you mentioned the Southern Company's proposal to ensure competition among wide-area SMRs by capping the amount of SMR spectrum any one licensee could manage or control in a given market. Ms. Sachs's July 29 Letter is apparently written on behalf of another one of her clients, Dial Call, Inc., and it attempts to defend that company's impending consolidation of the 280-channel SMR allocation in Atlanta, as well as its apparent acquisition of 58 non-SMR category frequencies in that same market.<sup>1/</sup>

<sup>1/</sup> The 1993 annual report of Dial Page, Inc. -- Dial Call's parent -- states that the company is in a position to secure 333 channels in the Atlanta area.

We write on behalf of the Southern Company to clear up the misimpressions the Letter creates. The Letter and its attached exhibit purport to demonstrate that there are "still a considerable number of frequencies available for inclusion in another wide-area system in the Atlanta area." Specifically, the exhibit lists 145 other channels now licensed to third parties. The Letter concludes that Southern can acquire such spectrum if it is prepared to spend "whatever price the marketplace commands" as "other wide-area SMR licensees have done." Letter at ¶¶ 1 and 3.

A careful examination of the list demonstrates that the facts do not support the Letter's conclusions. Instead, the list yields only further evidence of the market consolidation Dial Call has achieved. The list bears out Southern's experience in Atlanta; namely, that because of Dial Call's voracious acquisitions there is no true "marketplace" for spectrum. By and large, the "other" licensees on Dial Call's list have internal requirements which preclude them from selling, or make them extraordinarily reluctant to sell, their spectrum. In short, their circumstances dictate that their spectrum not be made available in a true market sense, contrary to what the Letter suggests. Dial Call's own actions confirm the lack of a market in the "other" channels. Southern understands that Dial Call has acquired its spectrum exclusively from entities like itself -- operators or owners of commercial mobile systems -- and not from traditional, non-commercial licensees.

**Dial Call's List of Purportedly Available "Other" Channels**

Of the 145 "other" channels, 83 are licensed exclusively to individual Public Safety entities (e.g., cities and counties with YP or GP systems) and 15 are licensed to Industrial/Land Transportation (I/LT) entities (e.g., land and air carriers and electric utilities with YO or GO systems). Historically, and as the Commission has long recognized, these entities obtain their own radio spectrum to address important internal needs. These licensees find their internal requirements so important that they are extremely reluctant to take service from a third-party commercial provider. Licensees in these services feel that they must control their own systems to ensure they retain responsibility for system performance. As a result, the

overwhelming majority of these licensees are unwilling to sell their spectrum at any price.<sup>2/</sup>

An additional 35 "other" channels are exclusively licensed to Business entities (with YB or GB systems). These entities are not necessarily more inclined to sell their channels, even though their radio operations might not be used for safety-related purposes as Public Safety and I/LT systems are. These licensees recognize that they too require internal control and ownership of their land mobile radio systems in order to meet their larger and long-term business objectives. Companies like Federal Express, EDS, ARINC, and Ardis (itself a Motorola affiliate) -- all of which employ multiple channels in Atlanta -- generally cannot part with their spectrum without adversely affecting their business operations. Federal Express, just as an example, might run its digital, nationwide package-tracking system over its frequencies, or it might dispatch and coordinate its vast fleet of delivery trucks. Moreover, none of these entities has expressed a willingness to sell its 800 MHz spectrum to Southern.

The remaining 12 "other" channels appear to be licensed to small SMR operators or to community repeater users (*i.e.*, users of non-profit shared systems run by an independent manager). If the channels are employed by SMR or community repeater operators, they might be considered "on the market" as the Letter suggests. Wide-area SMRs have been able to acquire many smaller segments of commercial-use spectrum by acquiring small commercial operators' entire businesses.

These few commercial-use channels, however, cannot be presumed to be on the market. Many small commercial operators' lives are bound up in their radio businesses, and as a result, they do not put their spectrum up for sale. Indeed, if all small commercial operators had their systems on the market, there would be no basis for the Nextel proposal. While that proposal deals with SMR category spectrum (and not directly with the "other" spectrum), it demonstrates that even in the commercial radio

---

<sup>2/</sup> For competitive reasons, Southern cannot divulge all the efforts its has made to acquire spectrum in Atlanta. Southern, however, has contacted local government entities in this process and has yet to find one indicating its spectrum is available for sale. Most recently, Southern contacted two local counties (which appear on Dial Call's list) with larger 800 MHz systems. Their responses were typical. Both indicated no interest in selling spectrum. Indeed, their systems are overloaded, and they need additional capacity to accommodate their governmental and police department users.

Ms. Karen Brinkman  
August 4, 1994  
Page 4

KELLER AND HECKMAN

environment the "market" for spectrum is imperfect. If all small commercial operators were willing to sell their spectrum, Nextel would not need the Commission intervention it seeks.<sup>3/</sup>

Dial Call's Own Acquisitions

Contrary to the Letter's suggestions, the adage "anything is available at a price" does not maintain in Atlanta. The Letter claims that Southern simply can emulate Dial Call's channel acquisition strategy. Not only does the above discussion belie that claim, but so too does Dial Call's own experience. As mentioned, Southern understands Dial Call has acquired its spectrum entirely from commercial radio operators. In the process, Dial Call has locked-up virtually all the channels which licensees have an interest in marketing. Indeed, Southern suspects that Dial Call's acquisitions have ceased at 333 channels only because no other channels are available for sale.

\* \* \* \* \*

In sum, notwithstanding Dial Call's suggestions to the contrary, Dial Call's consolidation of substantially all of the commercially available 800 MHz spectrum only supports Southern's position that a spectrum cap is required for the wide-area SMR market to function competitively.

Very truly yours,

*Carole C. Harris /  
Carole C. Harris*

Enc: Letter of Elizabeth R. Sachs dated July 29, 1994 (with attachment)

cc: Office of the Secretary (two copies for inclusion in GEN Docket No. 93-252 file)

Elizabeth R. Sachs, Esq. (counsel for Dial Call, Inc.)

---

<sup>3/</sup> In this regard, Dial Call's (and AMTA's) support for the Nextel plan seems to contradict Dial Call's assertion that all 800 MHz spectrum is available in the marketplace.

July 29, 1994

HAND DELIVERED

Karen Brinkman, Esq.  
Special Assistant  
Office of the Chairman  
Federal Communications Commission  
1919 M Street, N.W. Room 814  
Washington, D.C. 20554

RE: GN DOCKET NO. 93-252

Dear Ms. Brinkman:

During your meeting last week with me and Alan Shark, representing the American Mobile Telecommunications Association, Inc., regarding the above-identified proceeding, you noted the Southern Company's ("Southern") recommendation that the FCC adopt a limit on the amount of spectrum that could be authorized in a wide-area 800 MHz SMR system. I mentioned that my firm represents Dial Call, Inc. ("Dial Call"), a wide-area SMR licensee in the geographic area in which the Southern Company wishes to implement a similar system. I also mentioned that Dial Call had recently analyzed the 250 non-SMR frequencies which could be included in a wide-area SMR system under current FCC policy for a twenty-five mile radius around Atlanta, Georgia. This analysis was prepared for the Department of Justice, and was intended to identify which frequencies remained available for inclusion in a system such as that desired by Southern. This assumes, of course, that Southern is prepared to acquire this spectrum and relocate or otherwise accommodate existing licensees as all other wide-area SMR licensees have done.

A copy of that analysis is attached. We have identified those licensees which have already entered into an agreement with either Dial Call or Motorola, and whose stations would not be available for Southern's use. Unaffiliated licensees are labelled as "Other". You should also note that a small number of the 250 frequencies do not appear on this list, presumably because the

Karen Brinkman, Esq.  
July 29, 1994  
Page Two

licensees' stations are more than twenty-five miles from the center of Atlanta. It is likely that most of those stations would also be classified as Other since they would have been included at sites in Dial Call's wide-area system within a twenty-five mile radius if they were being acquired by that company.

As you can see, there are still a considerable number of frequencies available for inclusion in another wide-area system in the Atlanta area. A significant number of them are licensed to local government entities which have already been identified by Southern in its filings at the Securities and Exchange Commission as prospective users of its system. In fact, Southern itself is already the licensee of a large number of 800 MHz frequencies. There is still ample spectrum in Atlanta available for acquisition at whatever price the marketplace commands, and as negotiated by individual parties.

Please feel free to call me if you have any further questions.

Very truly yours,

A handwritten signature in black ink, appearing to read "Elizabeth R. Sachs".
